

# Data Processing for **Safer** Roads

# BIG PICTURE

## **Car crashes are the No. 1 killer of teens in America.**

Crashes cause far more teen deaths each year than homicide, suicide, cancer and drugs.<sup>1</sup>

**With no adult passengers, the risk of 16- or 17-year-old drivers being killed in a car crash increases 44% with one passenger under the age of 21;**

it doubles with two young passengers, and quadruples with three or more young passengers.<sup>4</sup>

# PROPOSAL

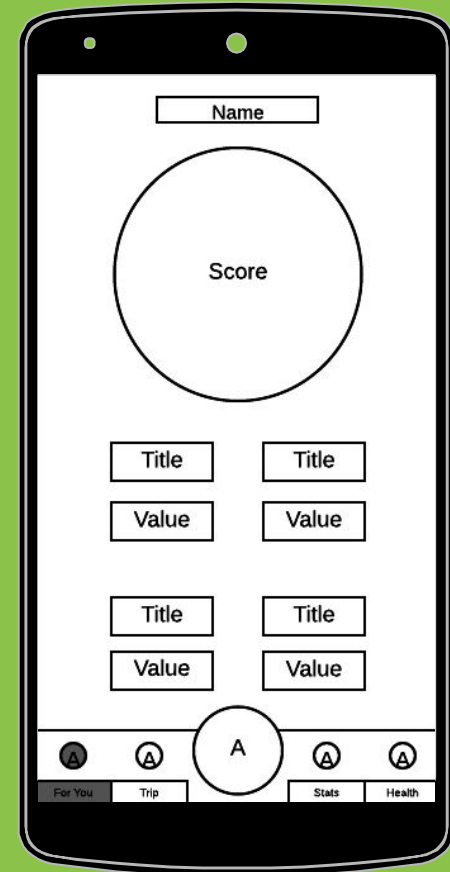

A “digital driving profile” created by the collection and analysis of the data produced by a vehicle.

To allow the “digital driving profiles” to be accessible to third parties (Parents, Bosses, etc) to provide oversight on an individual’s driving tendencies.

# Single-User

- ▶ “Smart Car” functionality allows for tracking car health and sensors.
- ▶ Individual oversight on driving tendencies and behavior.
- ▶ Customizable notifications and alerts.

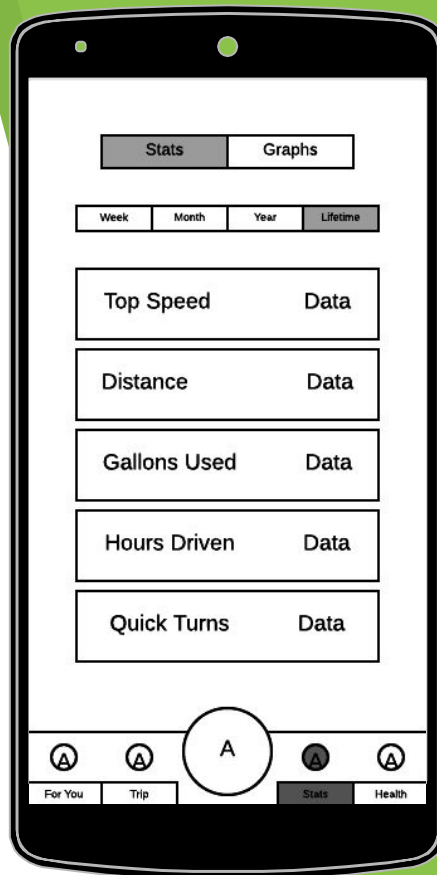

# Data Analysis and Visualization

- ▶ Raw data analysis via numbers. (ie. Top Speed = 78 mph)
- ▶ Data visualization via Graphs and Charts to present growth and improvement.

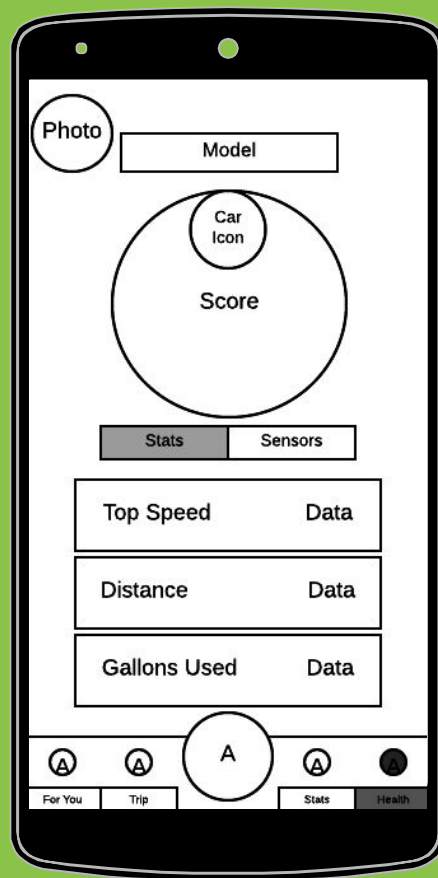

- ▶ Variable timeframes to highlight long and short term progress.

## Car Health and Sensors

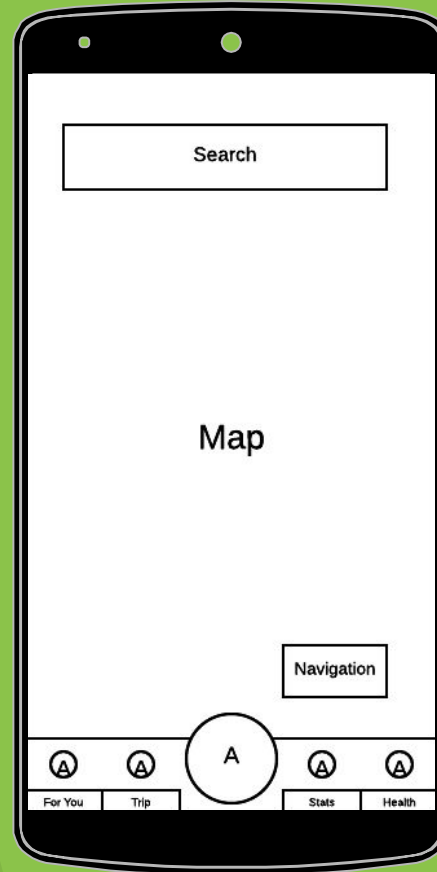

- ▶ View various statistics regarding the health and condition of the car.
- ▶ Become the mechanic and diagnose sensors such as the check engine light.
- ▶ Customize notifications or alerts such as oil changes every 2000 miles.

# Navigation and Application of Phone Sensors

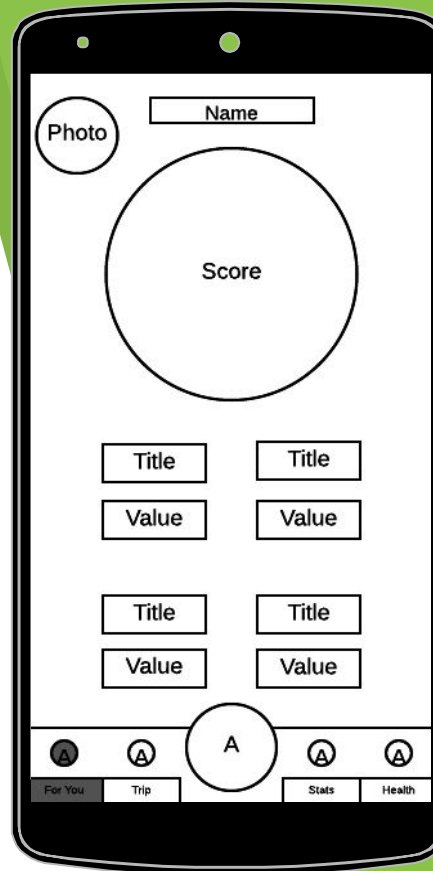

- ▶ Phone additionally provides number of data inputs that can be leveraged for analysis.
- ▶ Use of the forward facing camera to track eye movements, Microphone to analyze current car noise atmosphere, etc

# Multi-Profile Features

- ▶ Ability to provide oversight on other drivers.
- ▶ Customizable notifications and alerts allow for varying oversight. (Speeding violation, Destination arrival, etc)
- ▶ Creation of a virtual presence inside the car.

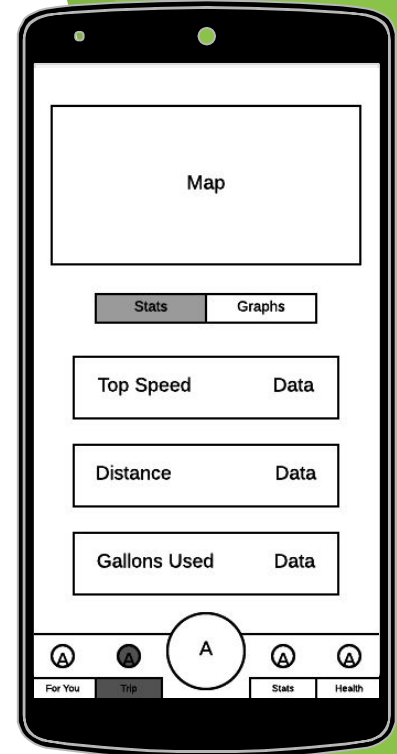

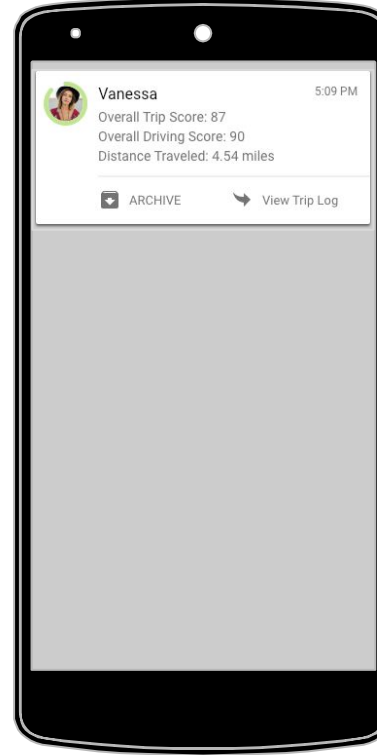

# Multi-Profile Features

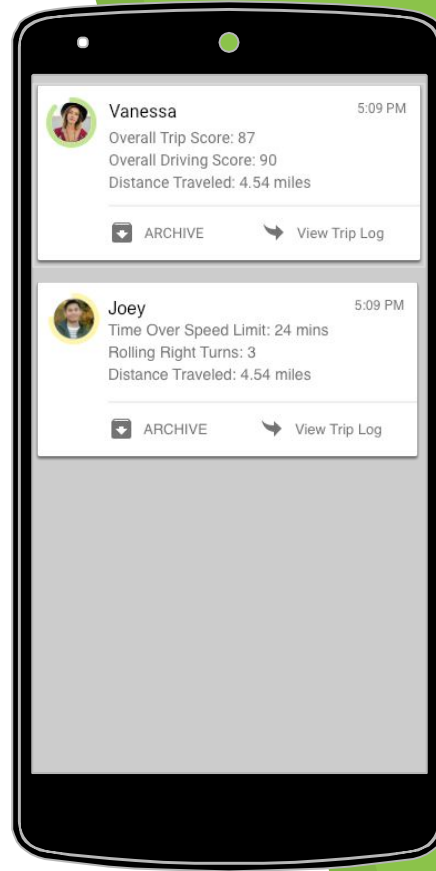

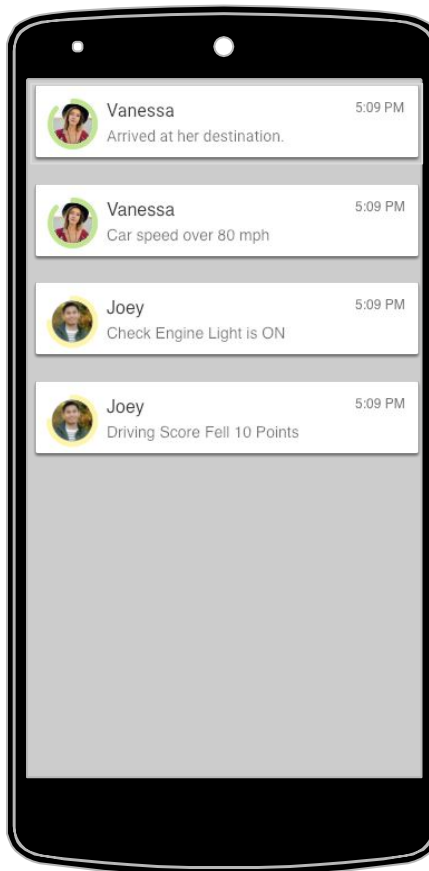

- ▶ Allows for real time information and status updates for loved ones, employees, etc.
- ▶ Fully customizable and scaleable to different types of alerts.

# Notifications

- ▶ Customizable alerts allow for variable oversight.
- ▶ Ensure your drivers are driving safely.
- ▶ Receive information immediately about car health and sensors.
- ▶
